PERSONALIZED HEALTH AND WELLNESS ASSISTANT

GANTT CHART

Course Title – Software Engineering

Slot – G2 + TG2

Name – Vansh Kumar Payala

Registration No. – 22BAI1386

Introduction –

The 'Personalized Health and Wellness Assistant' will serve as a new generation mobile application that will include artificial intelligence and machine learning components to suggest a recommended health and wellness plan based on data inputted by the user. This is a new concept which will include a chatbot and will assist the users with medication and prescription guidance; therefore, the usage of the app will be enhanced while appropriate health support will be provided. The most important one is to educate and give specific recommendations concerning the state of one's health and help to make the right decision.

To accomplish the mentioned above proposed objective of a well-structured and efficient manner of development, Software Development Life Cycle, namely the Incremental Model has been chosen. This way the application is develop in phases including this feedback of users and can be improved gradually by incorporating more features. Thus, when realizing the project in stages, it is also possible to ensure that each of the elements is functional and the final outcome is a usable application that will meet the needs of end-users. It also shows the concrete description of Incremental Model in the framework of the 'Personalized Health and Wellness Assistant', as well as naming all the activities of each phase and their outcomes.

Steps to Construct the Gantt Chart –

Step 1: Define Project Tasks and Milestones

- ➢ Project Initialization
- ➢ Requirement Analysis
- ➢ System Design
- ➢ Backend Development
- ➢ Frontend Development
- ➢ ML Model Development
- ➢ Chatbot Development
- ➢ Integration of ML Model
- ➢ Integration of Chatbot
- ➢ Testing
- ➢ Deployment
- ➢ Maintenance

Step 2: Set Start and End Dates for Each Task

- ➢ Project Initialization: Start Date: August 1, 2024; End Date: August 5, 2024

- ➢ Requirement Analysis: Start Date: August 6, 2024; End Date: August 21, 2024

- ➢ System Design: Start Date: August 22, 2024; End Date: September 9, 2024

- ➢ Develop Core Features: Start Date: September 10, 2024; End Date: September 30,2024

- ➢ Backend Development: Start Date: October 1, 2024; End Date: October 8, 2024

- ➢ Frontend Development: Start Date: October 9, 2024; End Date: October 11, 2024

- ➢ ML Model Development: Start Date: October 14, 2024; End Date: October 27, 2024

- ➢ Chatbot Development: Start Date: September 27, 2024; End Date: October 8, 2024

- ➢ Integration of ML Model: Start Date: October 7, 2024; End Date: October 8, 2024

- ➢ Integration of Chatbot: Start Date: September 23, 2024; End Date: September 24, 2024

- ➢ Testing: Start Date: October 14, 2024; End Date: October 28, 2024

- ➢ Deployment: Start Date: October 29, 2024; End Date: November 1, 2024

- ➢ Maintenance: Start Date: November 4, 2024; End Date: November 5, 2024

## *Step 3: Establish Dependencies Between Tasks*

- ➢ Requirement Analysis must follow Project Initialization.

- ➢ System Design depends on the completion of Requirement Analysis.

- ➢ Backend Development and Frontend Development start after System Design.

- ➢ ML Model Development and Chatbot Development start concurrently after Backend Development begins.

- ➢ Integration of ML Model and Integration of Chatbot follow the completion of both ML Model Development and Chatbot Development.

- ➢ Testing starts after Integration of ML Model and Integration of Chatbot.

- ➢ Deployment follows Testing.

- ➢ Maintenance is the final phase, starting after Deployment.

Step 4: Assign Resources to Tasks

- High-performance Computers for ML Model Development and Chatbot Development

- Servers for Backend Development and Deployment

- IDE for all development tasks

- Flutter SDK for Frontend Development

- Firebase/Firestore for Backend Development and Deployment

- TensorFlow/PyTorch for ML Model Development

- Dialogflow/Rasa for Chatbot Development

- Version Control System (Git) for all coding tasks

- ProjectLibre for project management

- Cloud Services (GCP/AWS) for Deployment

- CI/CD Tools (Jenkins, etc.) for Testing and Deployment

- Automated Testing Tools for Testing

- Unit Testing Frameworks for Testing

- UML Design Tools for System Design

- Adobe XD/Sketch/Figma for UI/UX Design

- Monitoring Tools for Maintenance
